Day

Reading

In reading we began putting the first of our three Daily 5 routines in to place this week. We started with Read to Self. This is independent reading time where students get to enjoy books of their choice. We have also been reviewing how to select good fit books, these are books that fit both our interests and reading levels.

Math

We began our first math unit. Unit 1 is a review of skills taught in first grade including calendars, telling time, relation symbols, temperature and counting coins. As part of this unit we have introduced the different tools we use to solve math problems. We have also learned some fun math games to strengthen our learning as well.

Writing

In writing we are working on writing a descriptive paragraph about each child in our class. We are working on planning for our writing through the use of a web and are working on starting our writing with a topic sentence. This has been such a fun way for us to get to know more about each other!

Core

We are having so much fun learning all about Maps in Core! Last week we put together two giant maps of the United States that are hanging in the halls of Bethke. Each student was assigned a state to trace and cut out and then had to put that state in the correct place on a map. In this unit we are also learning all about directions, landforms and the fifty states.
